

ABOUT MANDIANT

MANDIANT helps our customers overcome their most challenging information security problems through professional services, education and new incident response technology.

We use the knowledge and experience of our consulting group to design commercial software products. Our products are built for information security and forensics professionals who respond to security incidents and requests for electronic evidence. Our cutting-edge incident response technology and our expert knowledge of services to perform before, during and after an event enable our customers to respond better to potential compromises and intrusions.

Our newest product, MANDIANT Intelligent Response (MIR), is an enterprise-grade solution built by experienced software engineers. MIR represents years of experience collecting electronic evidence in response to computer security incidents, internal investigations, or electronic evidence discovery requests. It is designed to foster more effective response when electronic evidence needs to be collected, reviewed and reported. MIR provides capabilities to identify, collect, analyze and report on electronic evidence in a collaborative environment. It enables precision data collection, advanced analysis, case management and workflow control, and reporting tools. Employing a multi-tier, modular design developed by enterprise software experts, MANDIANT Intelligent Response is a solution like no other.
