ON-DEMAND CYBER INTELLIGENCE TRAINING

Uplevel your security team anywhere and anytime

HIGHLIGHTS

- Content includes 8-32 hours of videos, textbooks and assessments, accessible 24x7 through a standard web browser

- Courses align to different phases of the intelligence lifecycle and different job roles

- Live, instructor-led versions of all courses are available, either on-site or remote

- Cost is $1,000 per course (non-transferable)

Many organizations struggle to effectively use cyber intelligence to drive operations and critical training can interfere with scheduled security responsibilities. The career development pathway for analysts is often unclear, with no foundational, intermediate or advanced-level tracks. Students need training options that fit into their schedule and prepare them for on-the-job success both now and in the future.

On-Demand Intelligence Training is a cost-effective way to empower cyber security teams to effectively use intelligence across different job roles, at different skill levels. Courses can include videos led by Mandiant experts and practitioners, textbooks, interactive assessments and a live, instructor-led lab.

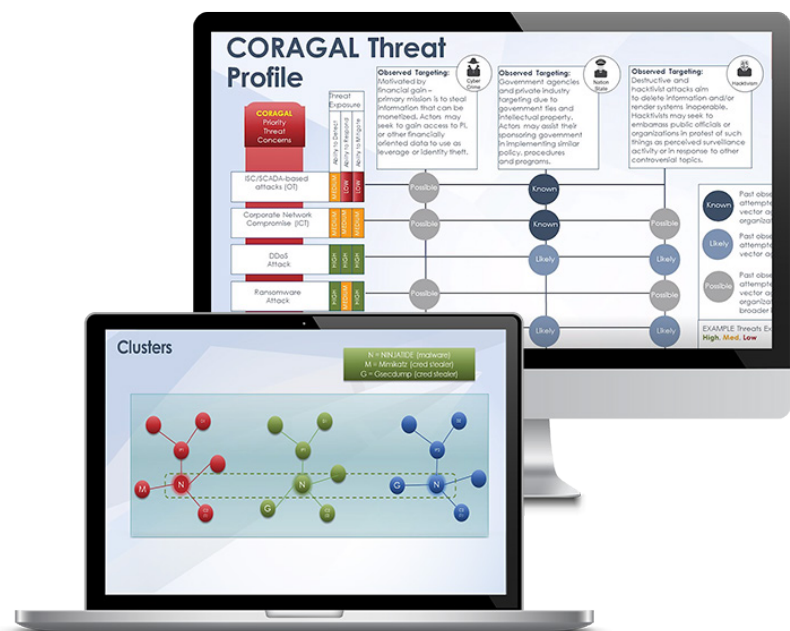

FIGURE 1. Online courses available 24x7 through a standard browser.

The value of Mandiant intelligence training

Incorporates real intelligence reporting

Mandiant intelligence reporting and case studies from the frontlines demonstrate the practical application of concepts.

Clears pathways for advancement

Courses are being developed for foundational, intermediate, and advanced learners, with clear pathways for career growth tied to different use cases and phases of the intelligence lifecycle.

Enables self-paced learning

Material can be accessed 24x7 for three months from date of purchase. During that time, learners can pause and return to training as often as desired.

TABLE 1. Available courses.	
Course	**Description**
Cyber Intelligence Foundations (CIF)	A foundational survey course that introduces the field of cyber intelligence. All subsequent courses reinforce concepts introduced here.
Intelligence Research I (Scoping)	Aligns to Planning and Direction Phase of Intelligence Lifecycle. Learn how to ask the right questions and identify relevant context to properly scope an RFI, assess sources and utilize a research management system.
Intelligence Research II (OSINT Techniques and Tools)	Aligns to Collection and Processing Phase of Intelligence Lifecycle. Learn how to use open-source tools to identify and think critically about ways to advance investigations across multiple use cases.
Intelligence Production (Q3 2021)	Aligns to Production Phase of Intelligence lifecycle. Learn how to structure, compose and edit intelligence products and briefings by deconstructing a series of vendor reports.
